TAN JING MIN, JEREME

Singapore | jerememetanjm@gmail.com | linkedin.com/in/jereme-tan | github.com/jerememetan | Portfolio: jerememetan.github.io

Technical Skills

Languages: TypeScript, JavaScript, Python, Java, C, SQL **Frameworks & Tools:** LangGraph, React, Vue, JavaFX, Supabase, Git, GitHub **AI:** LLM applications, multi-agent workflows, prompt orchestration, context retrieval

Experience

Teaching Assistant, Web Application Development II | Singapore Management University **Aug 2026 - Present**
Singapore

- Provide code reviews and technical feedback to 50+ students, helping them identify structural improvements in web application work.
- Communicate technical concepts clearly across varied programming experience levels and support class technical operations.

AI Engineer Intern | Alphatok Technologies **May 2026 - Aug 2026**
Singapore

- Built multi-agent workflows and state-management loops in LangGraph and TypeScript to integrate AI capabilities into production applications.
- Developed LLM knowledge-base infrastructure for context retrieval, prompt orchestration, and agent-state handling across services.
- Produced 10+ technical and architecture guides to document systems and support team onboarding.

Coding Instructor | Kodecoon Academy **Jan 2025 - May 2026**
Singapore

- Delivered coding and STEM lessons in Robotics Python, Scratch, and web/mobile development to learners aged 5-12.

Coding Mentor | Coder's Assembly **Aug 2025 - Nov 2025**
Singapore

- Mentored university students in Python; more than 60% of mentees achieved an A- grade or above.

Projects

QwenChaNa | Python, Alibaba Cloud models, multi-agent workflows
Built an agentic workflow that generates short videos using multi-agent pipelines and Alibaba Cloud models.

Face Recognition Smart Attendance System | Java, JavaFX, Supabase, facial recognition
Developed a GUI-based system that automatically records student attendance using facial-recognition models.

SussOrNot | Web extension, AI
Created the frontend and extension design for a hackathon project that uses AI to detect scams on e-commerce websites.

EmeraldLLM | C, Python, Lua, local LLMs
Integrated a local LLM into Pokemon Emerald trainer interactions to make gameplay more challenging and dynamic.

WWF CyberSpotters Web Scraper | Web scraping, automation
Developed a web scraper that generated 50+ listings documenting potential wildlife trade for volunteer review.

Alphaca | Java, Vue, full-stack development
Developed a full-stack platform for learning Gen Alpha slang, culture, and digital trends; won Best Project Award in the UBS-SMU-X Collaborative Software Development Project.

Peddit | Web application, user experience
Built a Reddit-style web app for sharing meal plans, connecting users, and tracking pets, with a focus on user and customer experience.

Education

Singapore Management University Singapore
Bachelor of Science in Software Engineering | Aug 2024 - May 2028 | GPA: 3.67/4.00

Awards

Mischcon De Raya Prize, Outstanding Solution on Transnational Crime (2024) | Top 20, Code#2025 (SMU Ellipsis x DSO National Laboratories) | 4th Place, Tic-Tac-Code (2024) | Top 20, Hack The Box

Certifications

AWS Cloud Practitioner | Google AI Professional Certificate | CS50's Introduction to AI with Python | CS50 Introduction to Computer Science
